**I doesn't matter if your operations
serve Wildland or Urban Alley-ways the
SilverFox® Rapid Attack Truck (R.A.T.) is
the ULTIMATE for maneuverability.**

Ever watch a dog chase its' tail? With a chassis having a wheelbase of just 127 inches and a cramp angle of up to 50° the R.A.T. should come with a warning tag on the dash that you may touch the front bumper to the rear bumper in a tight turn. It out maneuvers a pick-up truck!

Carrying as little as 500 gallons of water with ladders thru-the-tank or up to 700 gallons of water as an Interface or Grass Rig the R.A.T. is big on capabilities. You need water? PTO and midship pump installations will allow from 1000 to 2000 GPM operations for stationary or pump-in-roll operation.

You can haul a big load... with 143 cu. ft. of compartmentation and a minimum of 81 cu. ft. of hosebed the R.A.T. is able to be equipped as the Swiss knife of your department.

Based on the renowned 1871-SFO the R.A.T. brings a heritage of deployment from large cities like Chicago and San Francisco to the severe operations of California CDF and OES.

Driven Beyond Excellence

The 1871-SFO is available in many combinations with engines up to 350 hp, seating for up to 5 fire-fighters, and all of the "creature" comforts a crew would need.
